

EZ ACCESS

EASY ACCESS FALLING STREAM FLOW CELL

Compatible with TD-4100 and TD-4100XD Oil In Water Monitors

NEW PRODUCT RELEASE

The new EZ-ACCESS falling stream flow cell for TD-4100 and the TD-4100 XD oil in water monitors provides easy access for window cleaning and Emission Filter change out from the front without any disassembly.

All the benefits of our non-contact falling stream flow cell, plus pressure proof optical windows (100 psig) to prevent flooding in plugged drain situations.

This is a dramatic advance in our product line and no one in the market has anything close. Retrofits to existing TD-4100XD's in minutes.

Turner Designs Hydrocarbon Instruments is the worldwide leader in oil in water monitoring with a complete product line from bench top and hand held oil in water analyzers to continuous on-line monitoring systems.

Standard on all new TD-4100 & TD-4100 XD Instruments

- EZ retro-fit on all TD-4100 & TD-4100XD instruments
- EZ optical filter change for application adjustments
